Dear Colleagues,

Water resources management and energy are critical for our current society and will be of increasing importance in the future. Climate change is forcing us to reassess our energy usage and will have real and substantial impacts on the water cycle. Solving the interlinked challenges of water Resources Management, climate and energy in a sustainable manner is one of the fundamental goals of this generation.

Following on from conferences on Climate Change Adaptation and Water Resources Management and Energy, the Climate & Energy Conference Experts is proud to announce the inaugural World Congress on Water Resources, Climate and Energy in 2013. The Congress will explore the topics of resilient and sustainable cities with a focus on climate change adaptation and mitigation. The challenges of climate change adaptation and incorporating uncertainty into the city vision and infrastructure will be discussed together with the impacts and responses of climate change on water resources. Reductions in greenhouse gas emissions, operating in a carbon constrained world and a focus on renewable energy including practical applications and integration in to the energy mix will be covered.

Solutions to these challenges, including the role of technologies and smart networks will also be a central theme. Recognizing that technology is only part of the solution, the conference will also address the economic, political and regulatory aspects of water, climate and energy. The congress will attract up to 250 international participants for this global event and will feature a large industry presence and trade exhibition.

Submissions for oral and poster presentation are invited on the topics listed below supplemented by invited talks by world experts and political leaders.

Conference Topics includes, *Infrastructures *Environment and Ecology *Communications & Information *Climate Change Economics and Policy *Water, Agriculture and Food *Water Resources Management, *Special Programmes, *Water Pollution *Clean Energy Technology, *Bio energy and Biofuels, *Meteorological issues, *Climate change impact on energy resources, *investments, demand and production.

Proposal Submission: Interested presenters should submit an abstract of less than 500 words of text summarizing the proposed presentation and a short bio (100 words, email: conference@wrcec13.co.uk or fax: +44(0)7024013483 by 30th July, 2013. Submissions will be judged on relevance to conference themes, clarity of thought, data/documentated results, creativity, fit in conference program and other criteria. Deadline for notification of acceptance is 16th August, 2013.

Conference Registration: All presenters are expected to register immediately the abstract is accepted. Registration is free of charge for delegates from developing countries. Also free flight ticket, travel insurance, visa fees and per diem to be provided for all paper presenters and participating delegates. For more details on online registration, abstract submission, full papers and power point presentation, accommodation, flight, and venue, please email: conference@wrcec13.co.uk or fax: +44(0)7024013483

Important dates:

30th July, 2013 Deadline for abstract submission
16th August 2013 Notification of acceptance/Full paper Submissions
28-30 August 2013 Conference Dates

We look forward to welcome you at the conference.
